Subject: Dates for 1949 Biennial Inspection, Langley
Aeronautical Laboratory

1. Arrangements have been made with the Old Bay Line to reserve the steamer, City of Norfolk, southbound from Baltimore on May 18 and 24, and northbound, May 19 and 25, to accommodate guests attending the 1949 Biennial Inspection of the Langley Aeronautical Laboratory. These are the best set of dates that could be secured from the Old Bay Line and because of the discontinuance of the Norfolk and Washington Steamboat Company, these dates have been accepted.

2. Accordingly, dates for industrial and governmental groups to inspect the Langley laboratory will be Thursday, May 19, and Wednesday, May 25. The Langley laboratory is invited to submit recommendations for additional dates: (a) for the military services; and (b) the local military and educational institutions. It is suggested that such additional dates be after May 19 and before May 25.
