

Rocket Engine Test Facility (RETF)

Historic Documentation Credits

The Federal Aviation Administration (FAA), The National Aeronautics and Space Administration (NASA), The Ohio State Historic Preservation Office (OSHPO), and the Advisory Council on Historic Preservation (ACHP) established the scope of the recording project and monitored its production. The City of Cleveland and the Program Management Team guided the development of this recording project. Middough Consulting Inc, of Cleveland, Ohio served as the Project Manager. Hardlines Design Company of Columbus, Ohio, was subcontracted by Middough Consulting to oversee the production of all aspects of this documentation. Hardlines Design Company completed the HAER drawings and reports, molded content materials for this Web site, the videos, and the museum display. Historical Technologies of West Suffield, Connecticut, provided technical assistance and wrote the historical texts for the HAER documentation. The peer-reviewed history was written by Dr. Virginia Dawson of History Enterprises, Cleveland, Ohio. The museum display and restoration of the scale model was completed by Lucarelli Designs & Displays, Inc. of Brunswick, Ohio. The retiree videos and five- and twenty-minute videos were produced by NASA Glenn Research Center's Imaging Technology Center. Finally, this Web site was created by sitebyMike of Elgin Illinois.
